PROJECTS

Catalog App — *https://github.com/iraquitan/udacity-fsnd-p3-catalog-app.git*

- Created a catalog web app from the Udacity's Full Stack Web Developer Nanodegree using Flask framework and Bootstrap.
- Developed sign up options using local permission system with password hashing and integrated Google and Facebook sign in using Oauth2.
- Developed routes so signed in users can add categories and items to existing categories, and can only edit or delete their own items or categories.

Restaurant Menu — *https://github.com/iraquitan/udacity-fsnd-restaurant-menu.git*

- Created a restaurant menu app from the Udacity's Full Stack Web Developer Nanodegree. Using Flask framework and Bootstrap.
- Developed routes so users can add, edit and remove restaurants and menu items to their restaurants.
- Integrated Oauth2 sign in for Google and Facebook, so users can only edit and delete their own data.

Puppy Shelter — *https://github.com/iraquitan/udacity-fsnd-puppy-shelter.git*

- Created a puppy shelter app from the Udacity's Full Stack Web Developer Nanodegree. Using Flask framework and Bootstrap.
- Developed routes so users can add, edit and remove puppy profiles. They also can adopt puppies that are available for adoption.
